

## Eco-Warriors 2017 - 2018

Hermitage has formed its Eco-Committee for 2017-2018 and is now part of a global programme led by pupils to drive change and improve environmental awareness. As part of this programme, the pupils will be developing their leadership skills; increasing their understanding of local, national and international environmental issues - ranging from bio-diversity and healthy-living to litter and waste; and hopefully saving some money for the school! Throughout this academic year, the committee will complete the school environmental review and put together its action plan. With a raft of great eco-friendly ideas up their sleeves, the committee members are set to make the Hermitage Primary environment cleaner and greener!
